

CCLX ECOSYSTEM

CCLX Mission: “Provide Canadian commercial lines insurers a platform to share and access data about commercial risks that will help them improve their competitive position in the market.”

The CCLX Ecosystem: A series of data inputs from participating companies and third parties securely collected, stored and analyzed to create outputs that can be used in underwriting, pricing, marketing, claims and data science initiatives.

<p>Industry Data is collected through CCLX Stat Plan Schedules focused on traditional policy and claims variables for benchmark reports, as well as detail policy and claims history data.</p>	<p>The Industry, Licensed and Public data components acquired and collected are stored, secured and organized in the CCLX Data Repository using the Indatech Data Management Playbook to ensure data security, quality, accuracy, compliance and completeness.</p>	<p>Relevant data components are stored and organized in the Historical Statistical Database to create necessary reports, data files and rating factors.</p>	<p>COMPLETE Risk Profiles (Scouting Reports) including info about Construction, Occupancy, Market, Protection, Liability, Endorsements, Title and Exposure, as well as CCLX Risk Factors.</p>	<p>Various components of the Historical Database are used to create Insurance Risk and Other Factors for application to rating, loss development, underwriting and other processes. These components also add additional insurance risk assessment value to the CCLX COMPLETE Risk Profiles and Prospecting Reports.</p>	
<p>Third Party Data sources are identified and licensed regarding peril risks, building characteristics, environmental risks, title data, etc.</p>			<p>From the Historical Database Statistical Exhibits and Management Reports are produced in various report and data formats.</p>		<p>This additional information can also be used in data science initiatives.</p>
<p>Public Data, such as Real Estate, is acquired to identify supplementary commercial property and business information.</p>			<p>Prospecting Reports include marketing information for commercial properties and businesses with relevant insurance factors.</p>
